

this is our story

We are an extraordinary generation of children,
and we have a story to tell.

With our brilliant minds and oodles of
determination,  we're taking leaps to
develop big ideas, embracing new opportunities,
and welcoming everyone into our playful universe as
we share in the best moments of being a kid. 

Our dreams have no limits, our voices echo around
every corner, and we have the strongest belief that
we can make anything and everything possible with
 our greatest gift – imagination.

This is our time. This is our story.

“From Hair to There”®

Hair play doll features:

- Hair that grows!
- Braids can be extended to add extra volume to hairdos.

How it Works:

- Find the knob on the doll's back.
- Turn to the right to make the braids shorter.
- Push to release the hair and gently pull the braids to make them longer.

- Hair play is so much fun!
We suggest keeping the original hair grow braids to help avoid any tangles in the mechanism.

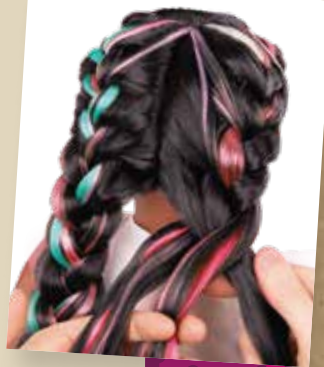

“Double Braided Buns”

Step 1

Part the doll's hair in half and grab 3 equal sections. Take the far-left piece and cross it over the middle.

Then take the far-right piece and cross it over the middle, as you would do for a simple braid.

Tighten the braid by gently pulling each section. Secure the end with a hair elastic. You can also add extra color by using the hair extensions.

Step 2

For a fuller braid, gently pull on the hair strands to add volume.

Step 3

Twist the braid into a bun and tuck the end of the hair underneath.

Secure with a hair elastic and repeat on the other side.

"Double Bubble"

Step 1

Gather equal parts of hair on each side to make 2 small ponytails, keeping loose hair in the back. Add extra color by using the hair extensions.

Step 2

To create the bubble effect, separate the ponytails into 3 to 4 sections with hair elastics.

Step 3

Push and pull the hair in between each section to make a bubble.

"Rainbow Bubbles"

Step 1

Add the hair extensions at the top of each side and make 2 ponytails. Mix in the hair colors to create a full rainbow effect.

Step 2

Separate the ponytails into 3 to 4 sections with hair elastics.

Step 3

Push and pull the hair in between each section to make a bubble.

“Triple Braids”

Step 1

Gather a section of hair on each side. Bring both sections to the middle and tie them together in a small ponytail.

Step 2

Flip the ponytail inwards.

ATTENTION: Avoid wetting the doll's head or body to prevent mold. Dry the doll at room temperature if her hair or body are wet. Do not use a blow dryer.

Step 3

Separate the hair into 3 equal parts. Divide the first section into another 3 equal parts to create a braid. Take the far-left piece and cross it over the middle.

Then take the far-right piece and cross it over the middle until the braid is complete and secure with a hair elastic. Repeat for the other 2 sections.

Now, use all 3 braids to create one final braid and secure with a hair elastic. Add heart clips to accessorize.
